Established since 2007

Summary

Northern Mountains Contracting “hereafter called as NMC” is an ISO certified and Saudi Electricity Company (Riyadh Electricity Department) approved contractor in the field of electric power distribution since 2007. We exist to serve the national cause of infrastructure development in the areas of electricity and civil works.

NMC has delivered multi-million contracts of Saudi Electric Company across different geographies within the Kingdom as main contract and partnered with multiple renowned companies like Philips, Alfanar, Al Gihaz etc. for the electricity distribution, streetlights deployment and maintenance contracts.

Aligned with the vision 2030 of H.H Crown Prince Mohammed Bin Suleman, Northern Mountains Contracting is fully equipped to partner the business venues pertaining to, but not limited to, National Grid, Power Distribution and EPC.

Existence with clarity of purpose

Our Philosophy

Our business philosophy revolves around customer-centric strategy through “Customer First” approach as our clients stay at the core of our business with a commitment of value creation in terms of quality of services, business growth and everlasting relationship.

Vision

With a vision to handover prosperous, brighter and environmentally safe future to the next generations, we position ourselves as the industry leader in infrastructure and renewable energy solution providers through a concept of “Learning and Growing Together” by trust-based partnerships with the industry leading organization ready to join hands more for the collaboration instead of competition ensuring to develop, maintain, retain and sustain a clean and green infrastructure within and beyond the boundaries of Kingdom of Saudi Arabia.

Mission

Following the vision 2030 by H.E Crown Prince Mohammed Bin Sulman, we will continue to play our role in creation of vibrant society, a thriving economy and an ambitious nation by contributing to the socio-economic activities of the Kingdom involving infrastructural revolution resulting in uplifting the status of common people, jobs creation and economic growth. The journey of Value creation through diversification will continue aiming at improvising user experience, and satisfaction of our internal & external customers, partners and stakeholders.

Existence with clarity of purpose

Values

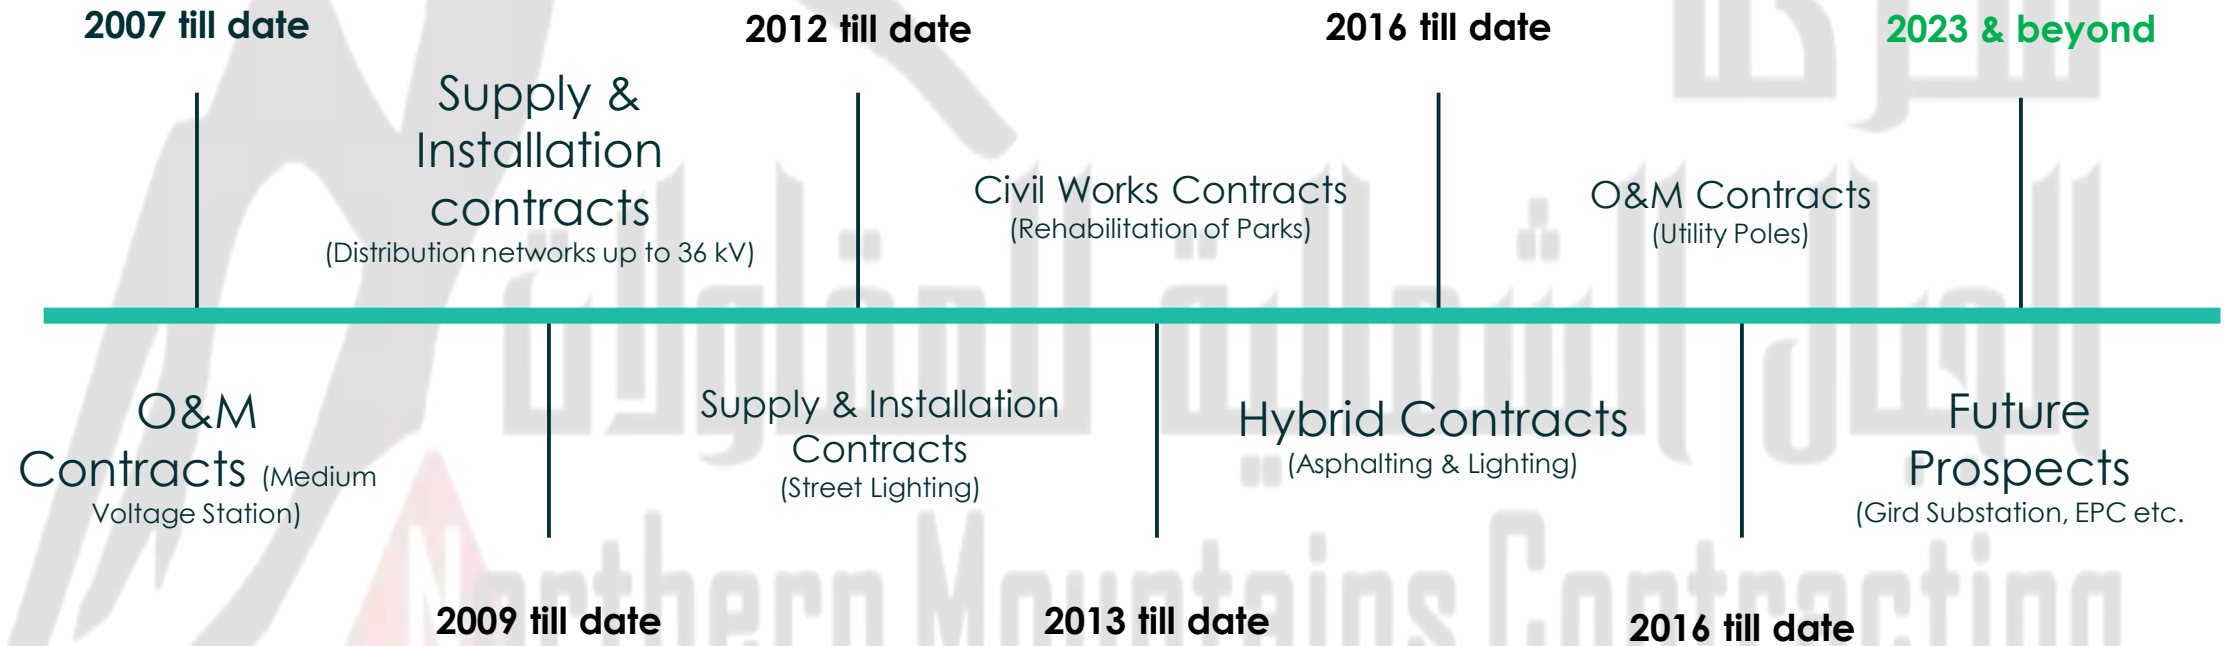

Customer First – We keep our customer at the core of the business; therefore, we come-up with next generation solutions to provide what our customer need by devising smart solutions and delivery strategies and by incorporating industry best practices.

Growing by Reflection – We believe in coming up with a better version of our own every other day. Hence, we are not only investing on the development of human resource development and instrumentation but also transformed the organizing truly believing and practicing highest standards of professionalism with the highest sense of quality, safety and efficiency.

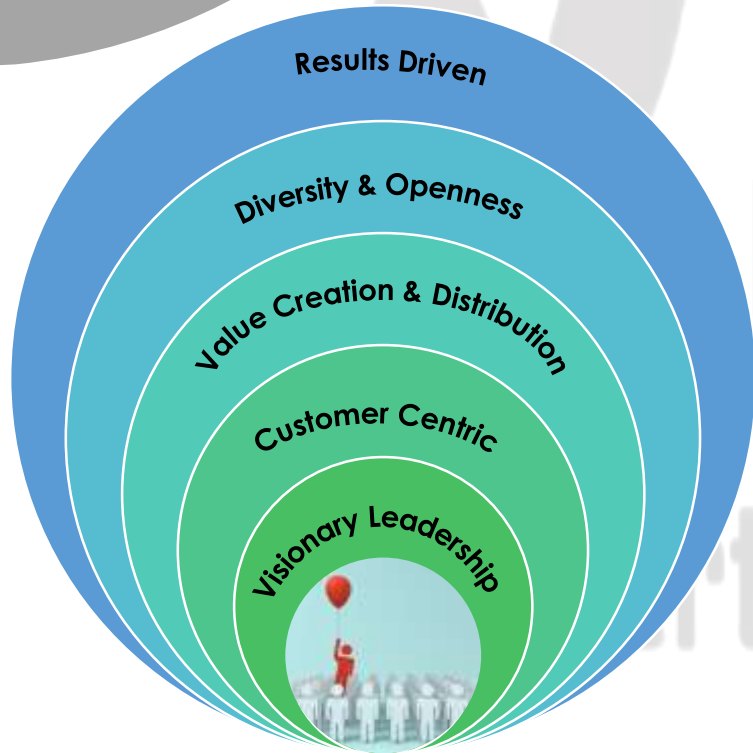

Resilience – Giving is not an option at all. Leadership proves itself during testing times. We may take step back as a strategy to come back even harder.

Integrity – We live up to the expectations of our customer, partners and stakeholders by keeping our commitments and by fulfilling our promises, hence we maintain the relations based on the exchange of respect and harmony.

Our Journey & Diversity

Areas of Expertise

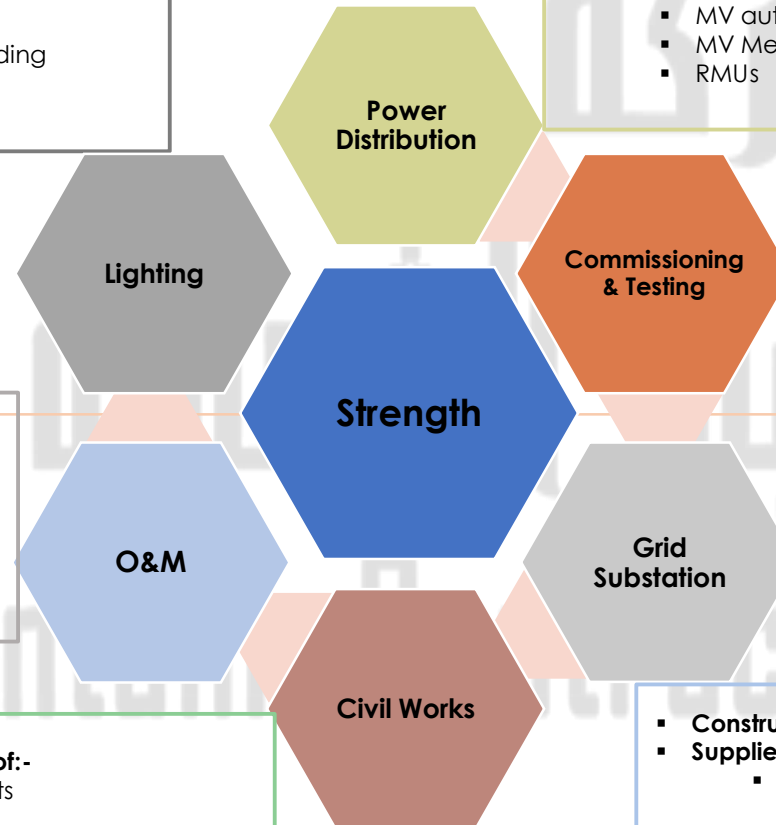

What makes us stand out !

 - Poles, Cables
 - Hard & plastic PVC pipes
 - LED Bulbs, fuse boxes
 - Distribution panels & grounding

- **Construction of Medium Voltage Electrical Distribution Network (Underground & Overhead)**
- **Supplies & Installation of :-**
 - Poles, Cables & Transformers
 - MV auto recloser & voltage regulators
 - MV Metering Units
 - RMUs

- **Operation & Maintenance of:-**
 - Medium Voltage power distribution networks
 - Streetlights network
 - Other Civic services

- **Construction & Rehabilitation of:-**
 - Roads and pavements
 - Public parks
 - Water reservoirs
 - Highrise Buildings

- **Network Commissioning**
- **Testing of network (prior to shutdown) to ensure:**
 - Standard Specifications
 - Functions & Features
 - QHSE standards
 - Compliances

- **Construction of Grid Substation**
- **Supplies & Installation of :-**
 - Power, Instrument & voltage Transformer
 - Lightning Arrester, Wave-Trapper
 - Circuit Breaker, Bus Bar, Isolator
 - Switchyard, Relay, Capacitor Bank

Major projects delivered

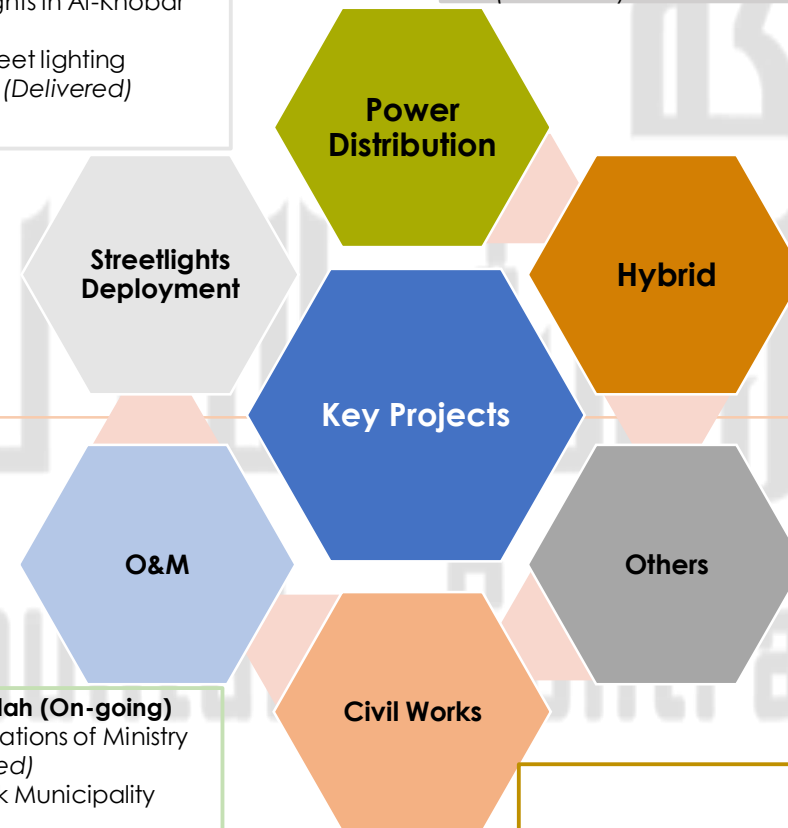

Delivered multiple projects adhering to the contractual timelines across different geographies.

BUSINESS VOLUME TILL DATE

- Development of Street Lights in Al-Khobar *(Delivered)*
- Supply and installation Street lighting Municipality of Dammam *(Delivered)*

- **Standard contract for distribution networks up to 36 kV - Riyadh area**
From 18/08/2021 to 31/05/2024 at Al Majmaá , Artawia, Remmah (On-going)
 From 02/08/2013 to 31/10/2016 *(Delivered)*
 From 2/3/1438 to 22/3/1440 : *(Delivered)*
